

Two collaborative R&D outcomes from Enzymicals AG were selected for the Innovation Radar by the European Commission.

The Innovation Radar is a European Commission initiative to identify high potential innovations and innovators in EU-funded research and innovation projects. Independent experts now identified our achievements within the EU-funded projects COSMOS and CARBAZYMES as innovative and analysed their market potential.

		
<i>Novel lipase enzymes with improved fatty acid chain length selectivity</i>	: Innovation Title :	<i>Expanded substrate scope of HDDHs for vicinal di-substituted epoxides</i>
<i>University Greifswald, Prof. Uwe Bornscheuer</i>	: R&D partner :	<i>Technical University Braunschweig, Prof. Anett Schallmey</i>
<i>Tech Ready</i>	: Market Maturity :	<i>Exploring</i>
<i>Addresses needs of existing markets</i>	: Market Creation Potential :	<i>Addresses needs of existing markets</i>

Picture: Innovations from our EU-Projects COSMOS and CARBAZYMES.

The information will be accessible to the public via the platform from 20 July 2020, joining the EU-funded innovations already showcased on the innovation radar.

Thanks to our academic partners for these successful collaborations!
