

ComBioCryst – idea won 2. Prize in idea competition

The jointly developed idea ComBioCryst of working group Jan von Langermann at University of Rostock and Enzymicals won the 2. prize in idea competition "Inspired- The ideas competition. In MV." In category "Researchers/Alumni".

ComBioCryst describe a new method for preparing amines in transaminase-catalyzed reactions of carbonyl compounds by in situ product crystallization. [1, 2]

Thus, the idea sketch has qualified now for the national final and will be presented there to a top-class jury on July 19th.

Currently, the partners are preparing an application for a development project to turn the idea into industrially applicable products and processes.
